University Academic Regulations Handbook (2026-2027 Edition)

Article 4.1: Mandatory Class Attendance Requirement
Every enrolled undergraduate and postgraduate student must maintain a minimum attendance of 75% separately in every registered theory and laboratory course. Students whose attendance falls below 75% will be debarred (detained) from appearing in the End-Semester Examination for that course and awarded an ’FA’ (Failure due to Attendance) grade.

Article 4.2: Medical Leave and Attendance Condonation
The Dean of Academic Affairs may grant a maximum attendance relaxation of up to 10% (lowering the threshold from 75% to 65%) strictly for documented hospitalization or representing the university in national competitions. Medical certificates must be submitted to the Academic Section within 5 working days of returning to campus.

Article 6.1: CGPA Grading Scale, Probation, and Honours

The university follows a 10-point Absolute/Relative Letter Grading System: O (Outstanding) = 10 points, A+ = 9 points, A = 8 points, B+ = 7 points, B = 6 points, C = 5 points, P (Pass) = 4 points, and F (Fail) = 0 points. A minimum Cumulative Grade Point Average (CGPA) of 5.50 is required for graduation in B.Tech programmes. Any student whose Semester GPA (SGPA) drops below 5.00 in a regular semester is placed on Academic Probation and restricted to a maximum credit load of 16 credits in the following semester. Students graduating with a CGPA of 8.50 or higher and zero historical backlogs are awarded B.Tech with Distinction.

Article 8.3: Academic Integrity, Plagiarism, and Generative AI Policy
All submitted theses, lab reports, and code repositories are screened via Turnitin and MOSS similarity checkers. Text similarity exceeding 15% (excluding bibliography and quoted citations) constitutes academic misconduct. Use of Generative AI tools (such as Gemini or ChatGPT) is permitted only when explicitly authorized by the course instructor and must be accompanied by an AI Disclosure Statement detailing prompts and verification steps. First-time violations result in zero marks for the assessment; second violations result in an ’F’ grade in the course.

Article 9.2: Answer Script Inspection and Revaluation
Students may apply for answer script revaluation within 7 calendar days of grade publication by paying a revaluation fee of Rs. 500 per course. If the revised score increases by 5% or more, the fee is fully refunded.
