Course Syllabus: CS-301 Artificial Intelligence & Machine Learning (Fall 2026)
Instructor: Prof. Ananya Sharma | Office: Turing Block Room 402 | Credits: 4.0

Section 1: Grading Policy and Evaluation Weightage
The final course grade for CS-301 is computed from four mandatory assessment components: Programming Assignments & Labs carry 25% weightage, the Mid-Semester Examination carries 25% weightage, the Capstone RAG & Agents Project carries 20% weightage, and the Comprehensive End-Semester Examination carries 30% weightage. To pass CS-301, a student must score at least 40% overall and at least 35% in the End-Semester Examination.

Section 2: Late Submission Policy and Slip Days
All programming assignments and project milestones are due at 11:59 PM IST on the announced deadline date. Each student is granted a total of 3 grace slip days for the entire semester, with at most 2 slip days usable on any single assignment. Once slip days are exhausted, late submissions incur a flat penalty of 10% per day for up to 3 calendar days. Submissions more than 72 hours (3 days) past the deadline will not be accepted and receive zero marks.

Section 3: Weekly Syllabus & Lab Requirements
Weeks 1-4 cover Uninformed & Heuristic Search (A*, Minimax) and Probabilistic Graphical Models. Weeks 5-8 cover Supervised Learning, Neural Networks, and Transformer Architectures. Weeks 9-12 cover Retrieval-Augmented Generation (RAG), Vector Databases (FAISS/Chroma), Dense Embeddings (MiniLM/BGE), and Grounded Evaluation Metrics.

Section 4: CS-301 Examination Schedule and Lab Hardware

The CS-301 Mid-Semester Exam is scheduled on October 14, 2026 from 09:30 AM to 11:30 AM in Lecture Hall Complex LHC-101. The End-Semester Exam is scheduled on December 08, 2026 from 02:00 PM to 05:00 PM in LHC-101. Mid-Semester exams are closed-book, except students may bring one handwritten A4 double-sided formula sheet. Final Capstone Project demos and code viva will take place on November 28, 2026 in the AI Systems Lab (Turing Block 204).
